Introduction

This document describes integration with Google as the identity provider.

For information on configuring Google for SAML SSO, refer to the following articles.

<https://support.google.com/a/answer/6087519>

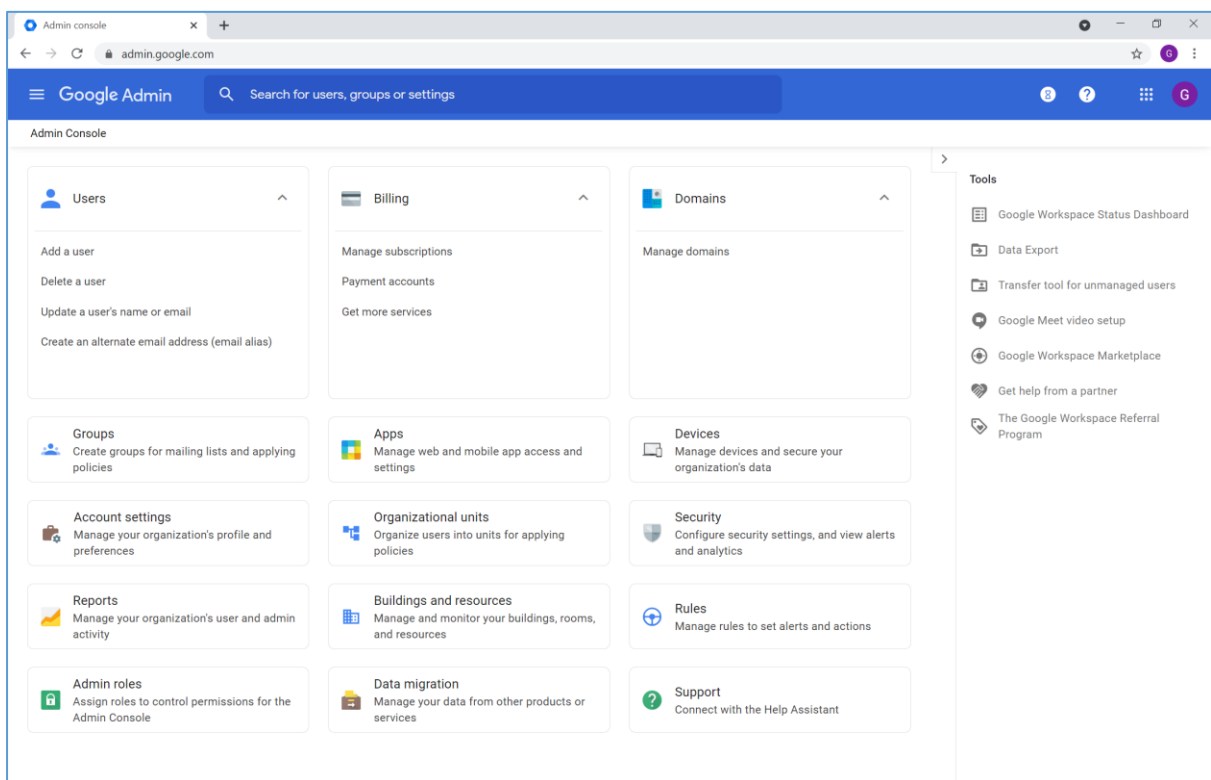

<https://support.google.com/a/answer/2463723>

Adding a SAML Application

Log into Google as an administrator.

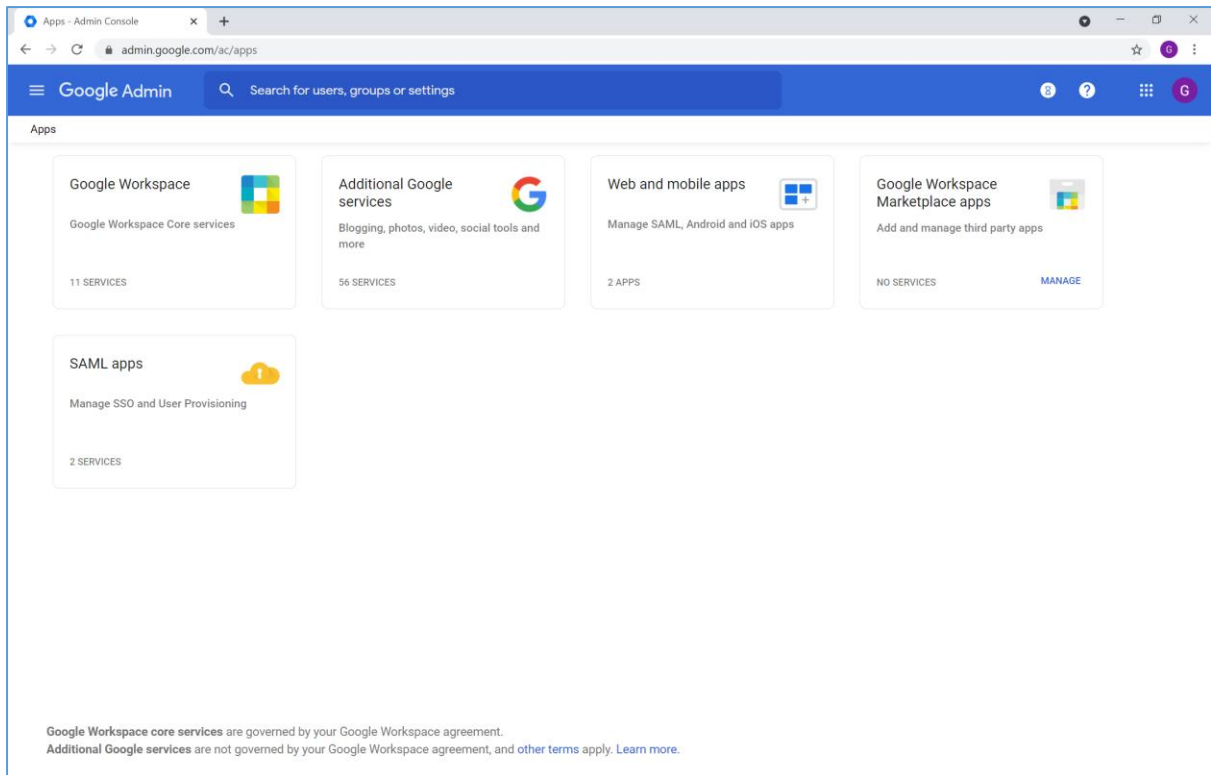

<https://admin.google.com/>

Select Apps.

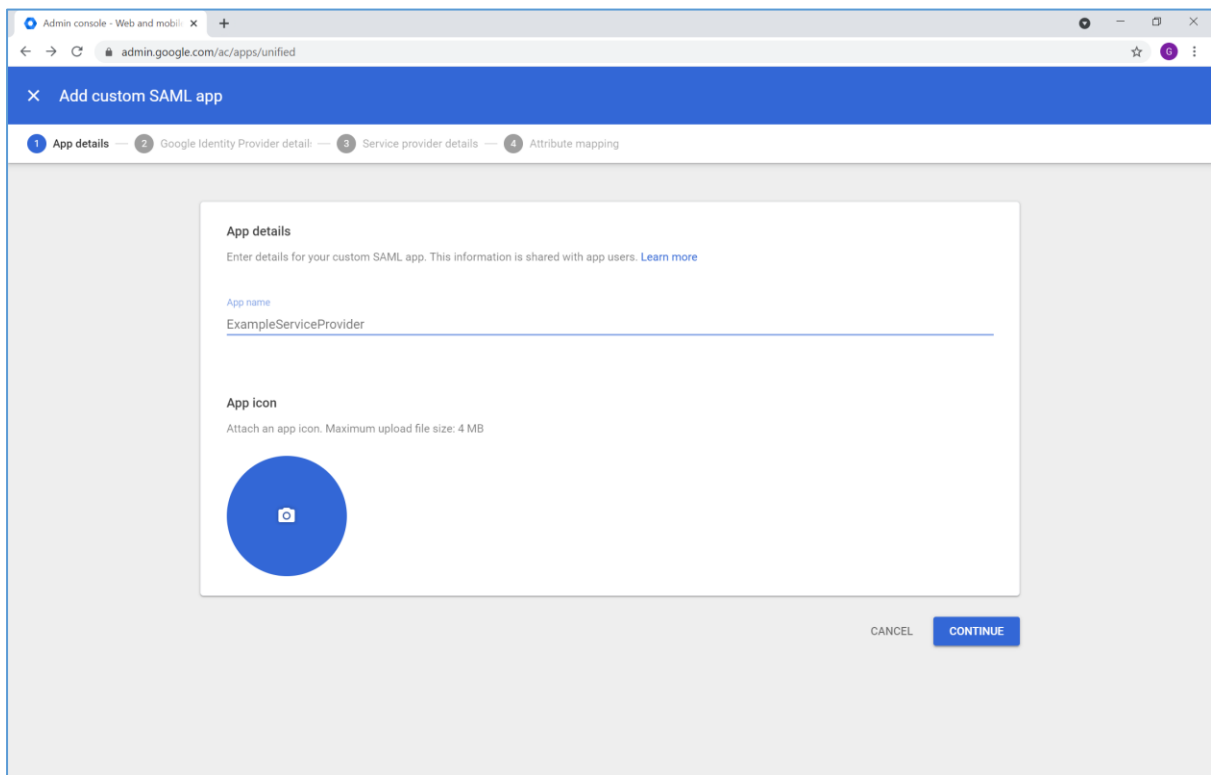

Select SAML apps.

ComponentSpace SAML for ASP.NET Core Google Identity Provider Integration Guide

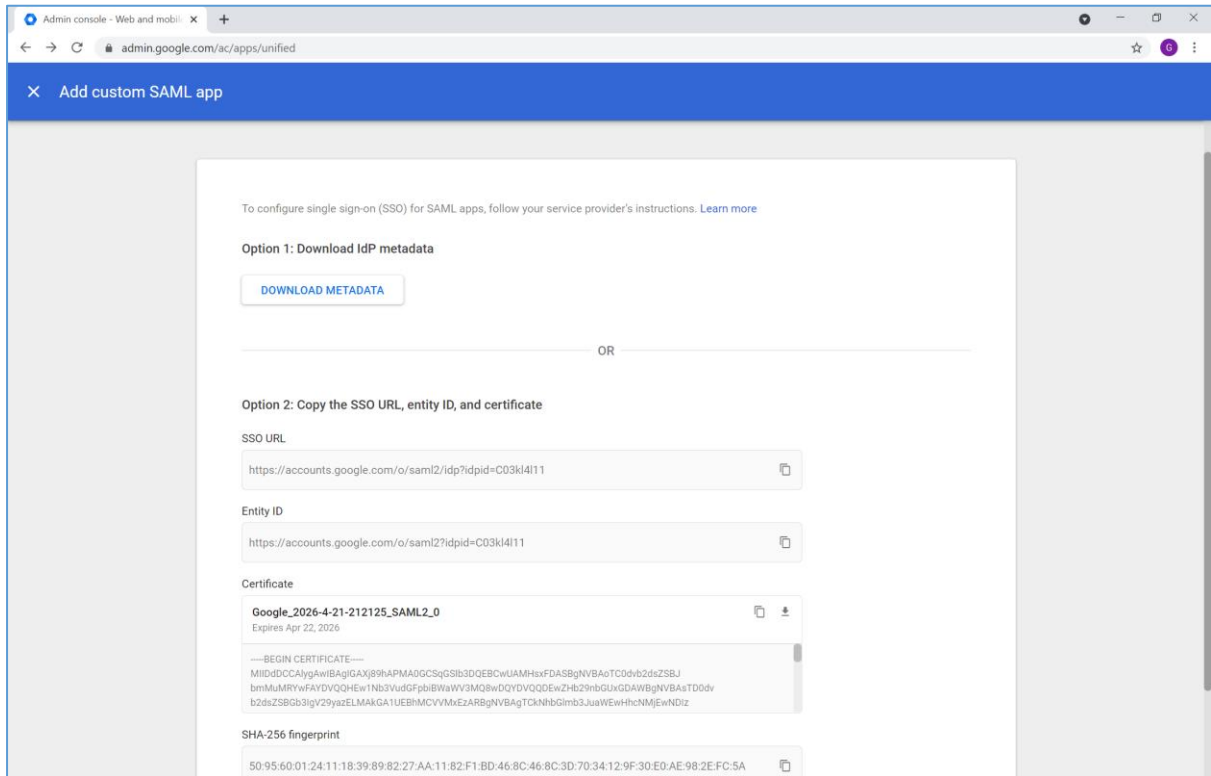

Click Add App > Add custom SAML app.

Specify an application name. This is for display purposes only.

ComponentSpace SAML for ASP.NET Core Google Identity Provider Integration Guide

Download the IdP metadata or take note of the configuration settings. This is used to configure the service provider.

Specify the service provider details.

The assertion consumer service URL is where the SAML response is received.

For example:

<https://127.0.0.1:44360/SAML/AssertionConsumerService>

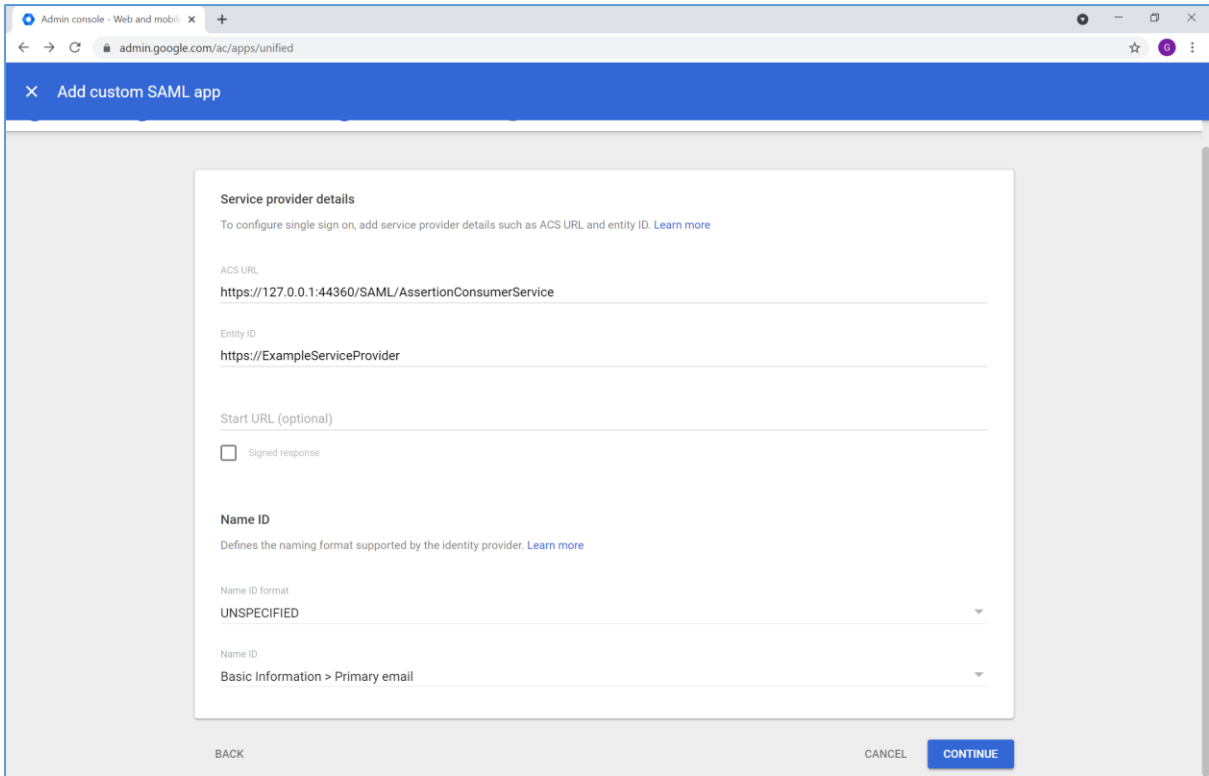

Note that Google doesn't permit localhost URLs.

The entity ID is the service provider name.

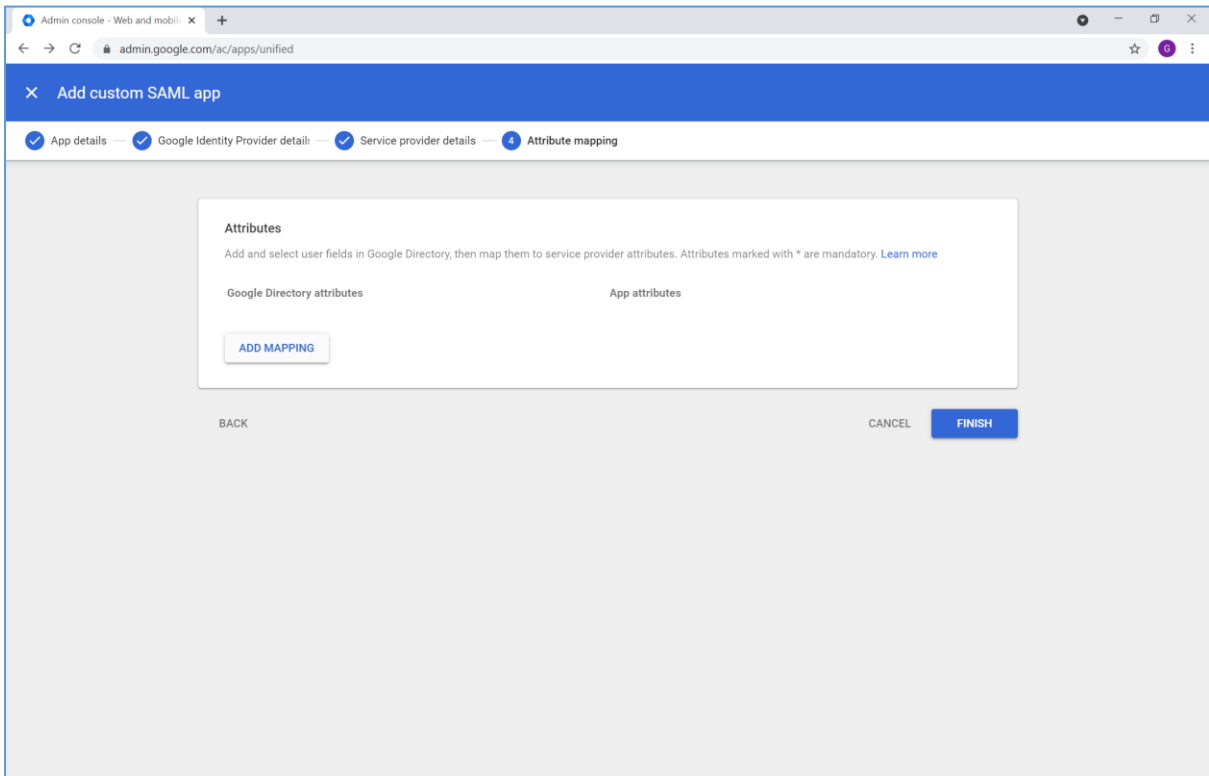

For example:

<https://ExampleServiceProvider>

Attribute mappings may be specified if required.

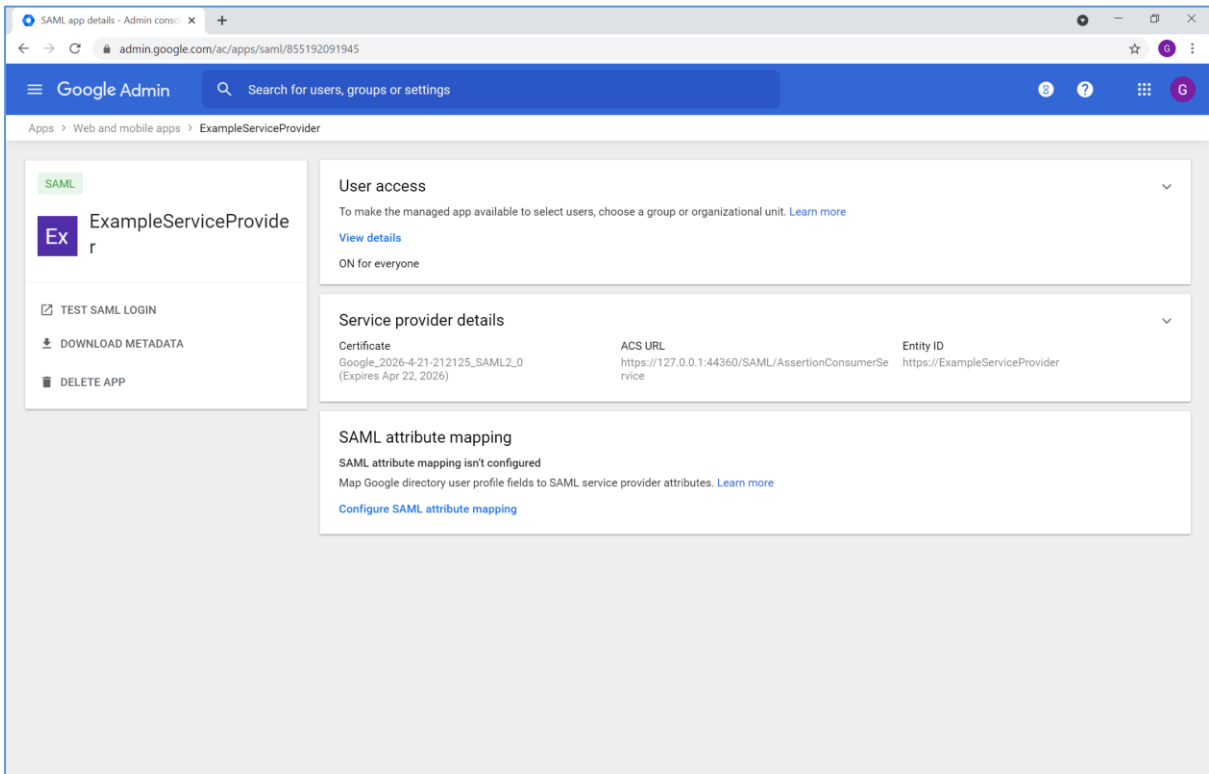

Ensure the application is turned on for everyone.

The SAML configuration is complete.

Service Provider Configuration

The following partner identity provider configuration is included in the example service provider's SAML configuration.

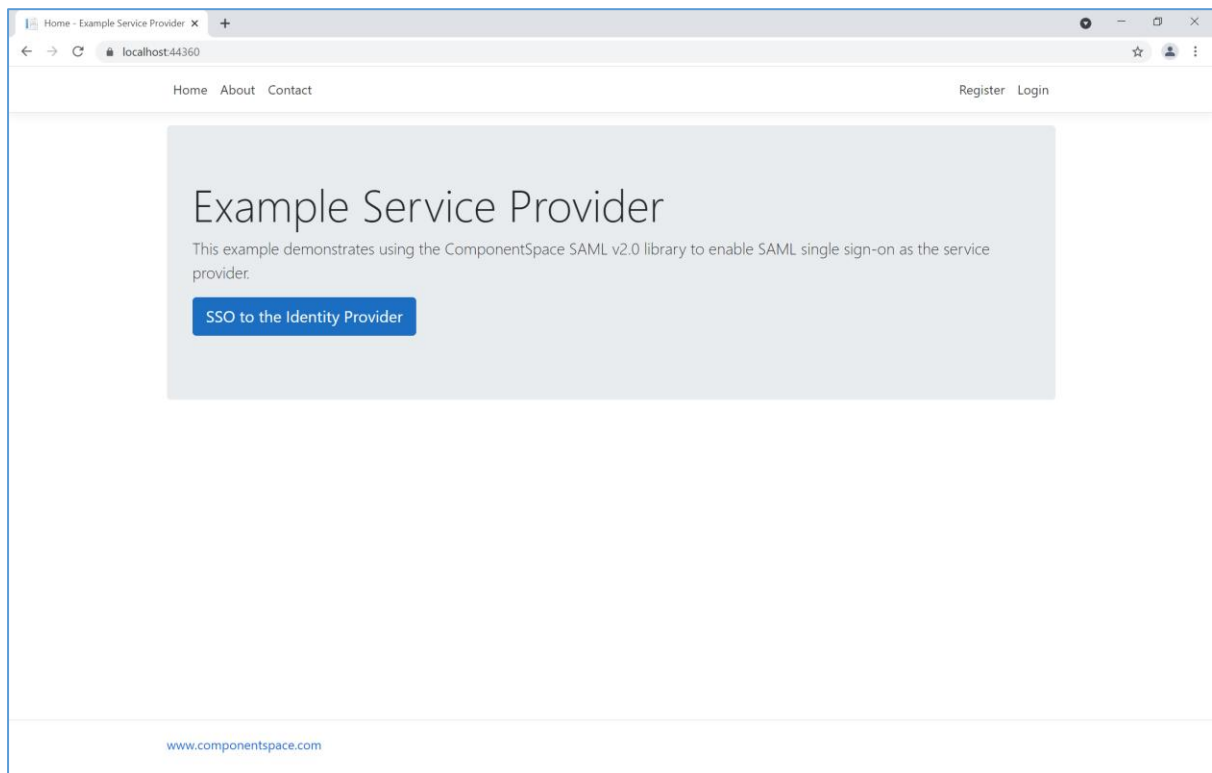

```
{
  "Name": "https://accounts.google.com/o/saml2?idpid=C03kl4l11",
  "Description": "Google",
  "SingleSignOnServiceUrl": "https://accounts.google.com/o/saml2/idp?idpid=C03kl4l11",
  "PartnerCertificates": [
    {
      "FileName": "certificates/google.cer"
    }
  ]
}
```

Ensure the PartnerName specifies the correct partner identity provider.

```
"PartnerName": "https://accounts.google.com/o/saml2?idpid=C03kl4l11"
```

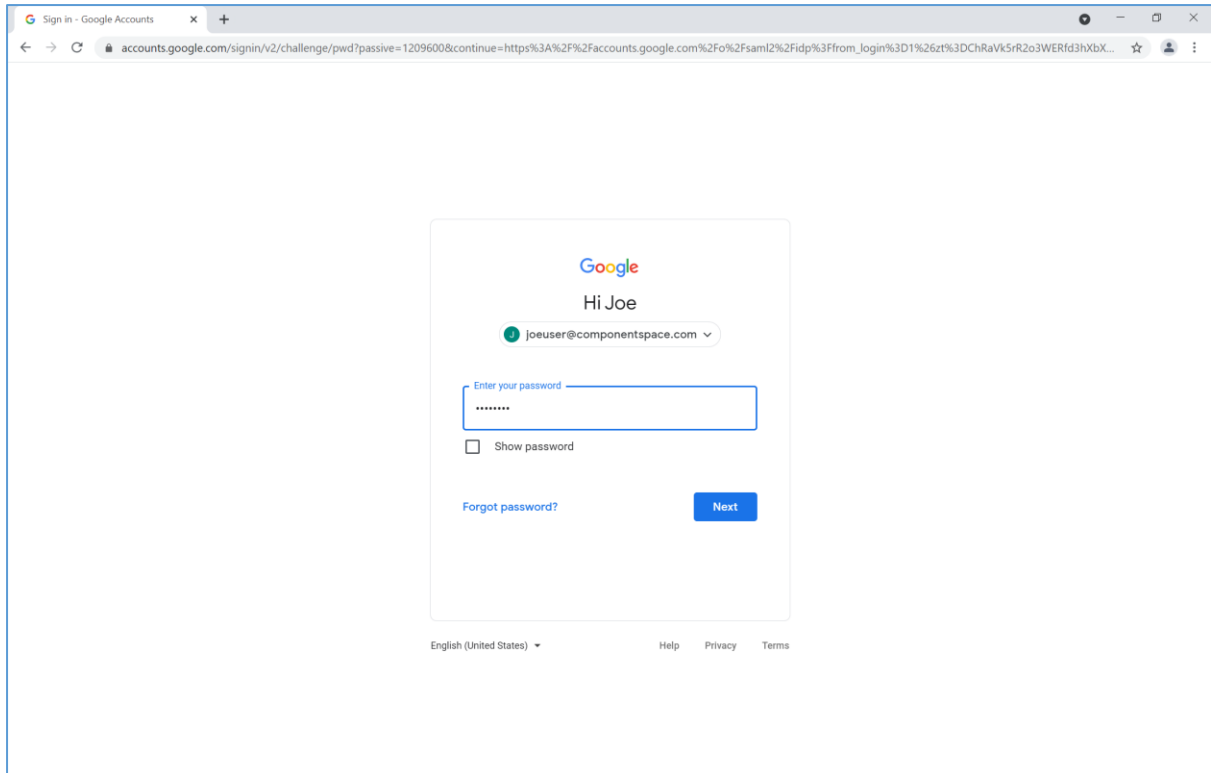

SP-Initiated SSO

Browse to the example service provider and click the button to SSO to the identity provider.

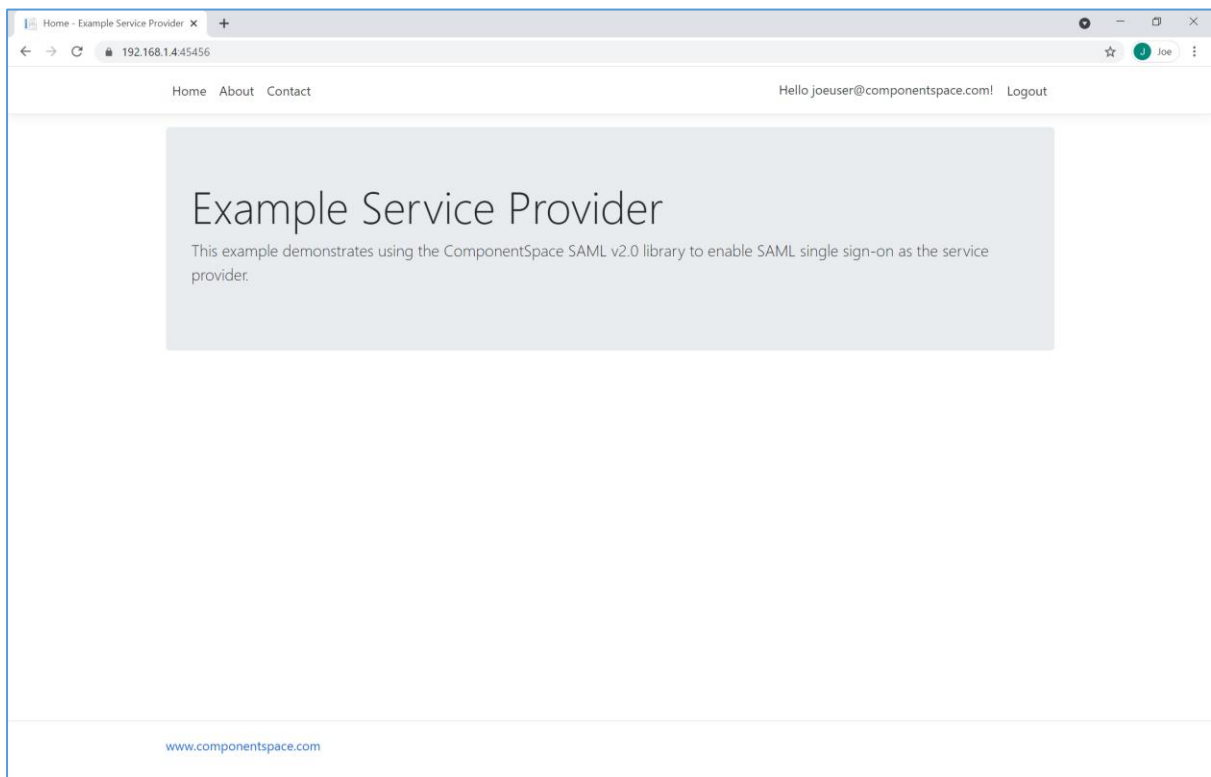

Log into Google.

ComponentSpace SAML for ASP.NET Core Google Identity Provider Integration Guide

The user is automatically logged in at the service provider.

IdP-Initiated SSO

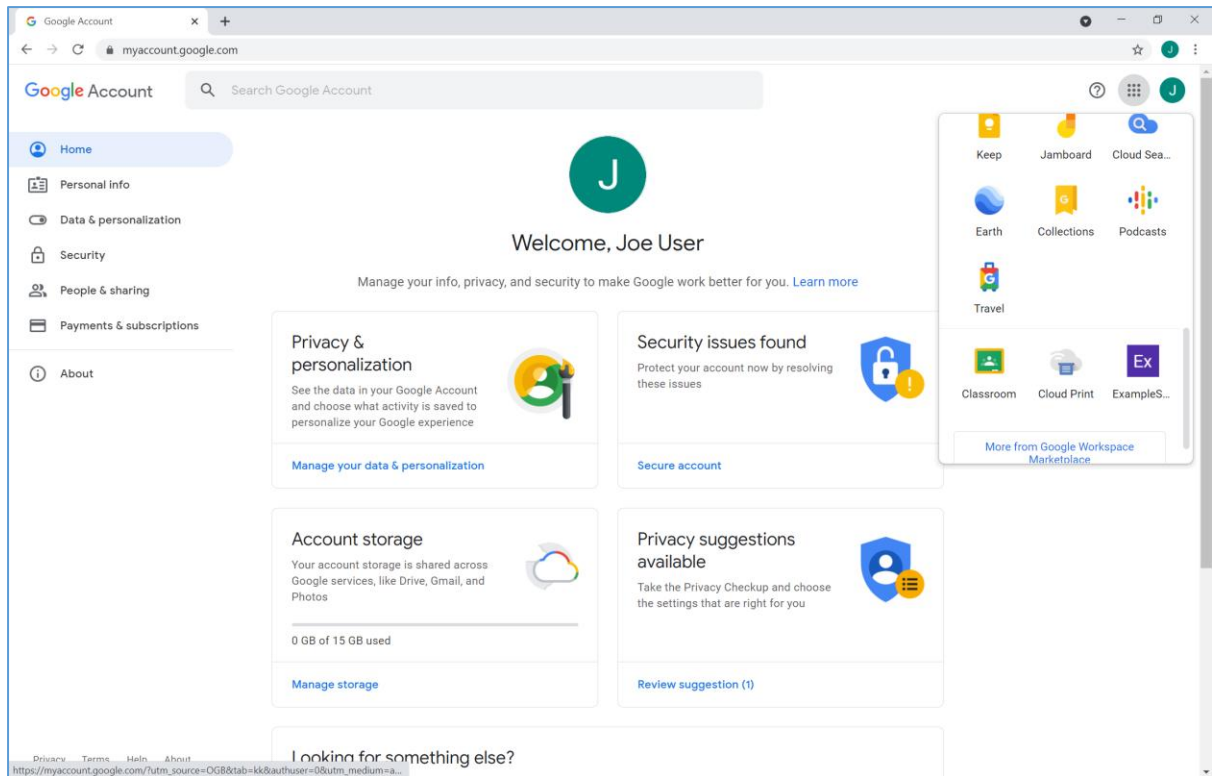

Browse to Google and login.

For example:

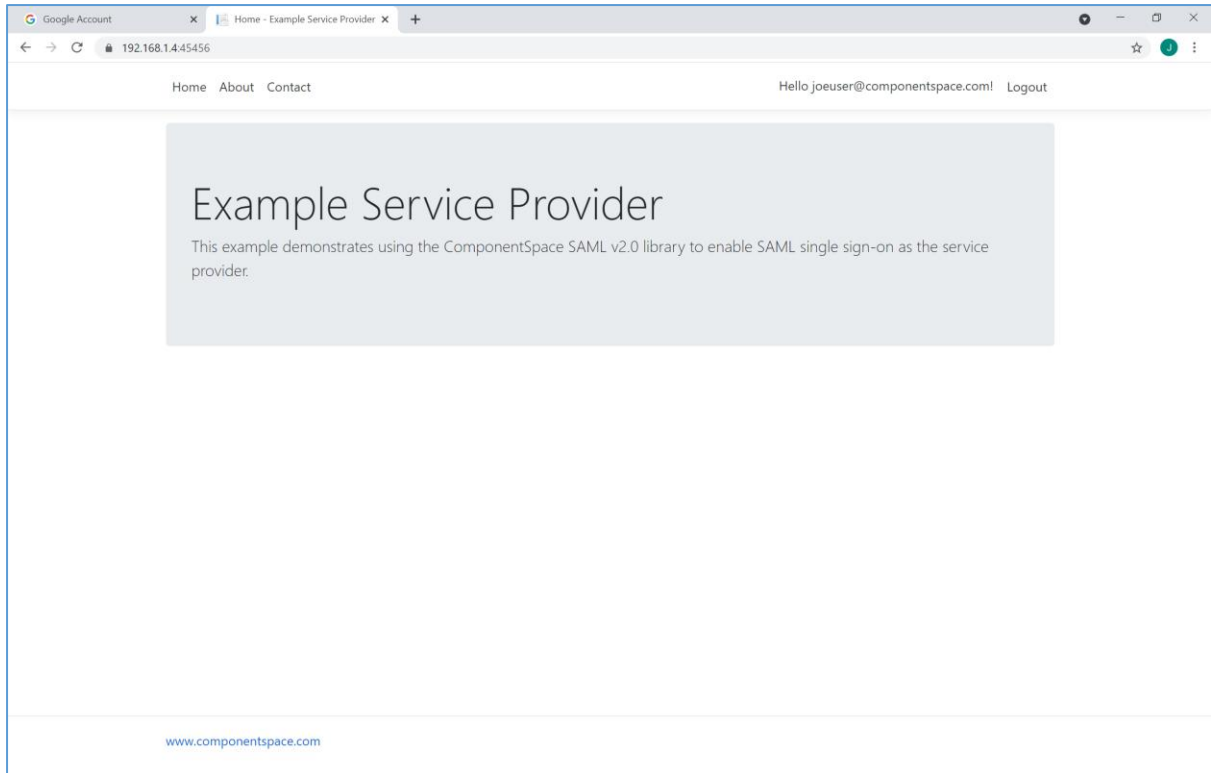

<https://myaccount.google.com>

Click the Apps button to show the applications.

Select the example service provider.

The user is automatically logged in at the service provider.

SAML Logout

Google doesn't support SAML logout.
